Project Title: Pikachu Website

I would like to build a multi-page website with a navigation bar at the top. There would be a page for each section:

- Home page
 - Basic intro of pikachu and the pokemon franchise
- concept design
 -
- appearances in video games
 - Stats
 - Movepool
 - Pokedex entries
 - evolution
 - Every game appearance
 - Special event versions
- Card variations
 - Most popular appearances
 - Limited editions
- appearances in anime (TV)
 - First appearance
 - Every series
 - Special episodes
- appearances in film
- Merchandise
 - Promotional items
- Sources
 - Wikipedia
 - Photos
 - Any other credits
